

INVITATION TO GREEN TRANSITION RESEARCH BRAINSTORM EVENT

Green Transition Research Brainstorm Event

Monday 9 March 2020 at 08.30

Aarhus University, Deep Tech Experimental Hub, Skejby Nordlandsvej 301, Aarhus N

Danmarks Frie Forskningsfond (DFF)/Independent Research Fund Denmark has put out a research project call out on Green Transition for 360 million DKK in 2020.

We at Aarhus University, AU DIGIT and AU Engineering would very much like to pursue this DFF call by building projects that will take Denmark into the next era of Green Transition.

In doing so, we are hosting a Green Transition Research Brainstorm Event on March 9th 2020, where we invite public and private companies and researchers for dialogue and project idea pitches.

We would very much like for all interested researchers to present their project idea and/or tech pitch at this event.

So please send a 1 page powerpoint including information on 1) your research and 2) your idea - and send it to Hugo Daniel Macedo at hdm@eng.au.dk no later than March 1st 2020. By doing so, you will meet likeminded colleagues who can potentially help you in developing your idea.

If you have any questions regarding the above, please contact: Annabeth Aagaard at aaa@btech.au.dk

We look very much forward to seeing you all on March 9th for a day of great idea brainstorming!

Best regards,
Peter Gorm Larsen
Professor, AU DIGIT

PROGRAMME

08.30 - 09.00	Registration and coffee
09.00 - 09.15	Introduction, by Prof. Peter Gorm Larsen, AU DIGIT
09.15 - 09.45	Speaker - TBD
